

GLOVES ON, RISKS DOWN

Rethinking hand protection at work.

The Unseen Hazard: Hand Injuries at Work

Did you know that hand injuries are among the most common workplace incidents? Often overlooked, our hands are vulnerable to cuts, abrasions, burns, and more. These injuries not only cause pain and suffering but also lead to lost productivity and increased costs for businesses.

The Glove Dilemma: Why We Resist Protection

Despite the known risks, many workers resist wearing gloves. Why? Common reasons include:

- **Discomfort:** Bulky, ill-fitting gloves can hinder dexterity and make tasks more difficult.
- **Peer Pressure:** A 'tough' image or perceived inconvenience can lead to skipping glove use.
- **Lack of Awareness:** Underestimating the risk or not understanding the importance of hand protection.

- Improved Grip
- Enhanced Dexterity
- Better Breathability
- Snug Fit
- Stylish Design

Modern Gloves: A Game Changer

Forget the bulky, uncomfortable gloves of the past! Today's hand protection boasts innovations like:

Modern materials offer superior protection without sacrificing comfort and flexibility.

Building a Hand-Safe Culture

Creating a workplace where glove use is the norm requires a multi-pronged approach:

- **Leadership Commitment:** Managers must champion hand safety and lead by example.
- **Training & Education:** Equip workers with the knowledge and skills to select and use gloves correctly.

- **Positive Reinforcement:** Reward safe behaviors and recognize those who prioritize hand protection.
- **Make it a Habit:** Use implementation intentions (if/then plans) to make wearing gloves an automatic response.

The Bottom Line: Protect Your Hands, Protect Your Future

Hand injuries are preventable. By rethinking our approach to hand protection, embracing modern glove technology, and fostering a safety-conscious culture, we can create workplaces where everyone goes home with their hands intact. It's time to put gloves on and bring the risks down!

Key Takeaways

This article highlighted the prevalence of hand injuries in the workplace and the importance of consistent glove use. We explored the reasons why workers might avoid wearing gloves, and suggested ways to overcome these barriers, focusing on new glove technology and promoting a safety-first culture driven by leadership.
